

14th May 2013, Field Day in Irbid – Jordan

Under the patronage of HE Minister of Agriculture, Dr. Hazem Al- Naser, the National Center for Agricultural Research and Extension (NCARE) in collaboration of EU SWIM project " Adaptation to Climate Change of Mediterranean Agricultural Systems (ACLIMAS)" will organize a big agricultural field day in Irbid province and at Maru station where the ACLIMAS project activities are going on.

The main objective of this event is to show to the stakeholders (decision makers, farmers, researchers, extension agents and end users) the performance of the pilot demonstrations implemented at Maru station within ACLIMAS project such as

- Tillage x cultivar durum Wheat
- Tillage x cultivar Barley
- Tillage x Cultivar Durum wheat x Sowing date
- Drought responses to wheat and barley genotypes .

Moreover, the focus will be on the on- ground implementation work implemented at the farmer's fields participating in the project (the use of improved wheat and barley varieties under zero-tillage practices and the use of full-package on wheat and barley production under dry conditions).
